Technical information

Productnumber : 99-7596

Product description

With this smart system you can replace the conventional roll container. The smart undercarriage in combination with lid makes one closed whole. The undercarriage can be blocked and unblocked with one foot movement. The system is made of plastic and suitable for 600 x 400 euro bins. The load capacity is 500 kg. The undercarriage rests on two swivel wheels and two fixed wheels. The length of the lashing strap is 2000 mm. We therefore recommend a maximum stacking height of 1900 mm to guarantee stability.

Specifications

Article arrangement: New

Version: suitable for euro boxes 600x400 mm

Top: with synthetic lid

Wheels back: 2 rigid wheels
