## Technical information

Productnumber : 48-3412

### Product description

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

### Specifications

Article arrangement: New  
Version: for 2 x 200 l drums  
Floor: with galvanized grid  
Colour: grey  
Width (mm): 850  
Volume (ltr): 200  
Type number: 48-3412

Type: depot with roof  
Material: polyester  
Subgroup: Hazardous substance depot  
Length (mm): 1500  
Height (mm): 2110  
Weight (kg) 85  
EAN Code (Gtin) 8719424104370
