Product description

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New
Version: for 1-4 200 l drums
Walls: flat steel plate
Top: 1000kg/m²
Colour: blue
Surface treatment: painted
Width (mm): 1460
Insertion height (mm): 100
Weight (kg) 144
Type number: 404
EAN Code (Gtin) 8719424006261

Type: receptacle for drum
Material: steel
Floor: with galvanised grid
Subgroup: retention basin steel
Ral colour: 5012
Length (mm): 1460
Height (mm): 355
Loading capacity (kg): 855
Collection volume (ltr): 525
Additional specifications: StawaR approved (DE)
