Product description

Safe grip and highest carrying comfort for curved panes: The 2-cup suction lifter with swivel heads convinces due to its large, non-slip gripping area and lies perfectly in your hand. The two moveable swivel heads are ideal for handling or inserting curved materials, such as windscreens or rear windows in the automotive industry. Thanks to the elongated holes in the swivel heads, even strongly curved surfaces with increased curvature can be handled. The levers have an ergonomic and user-friendly design. Their wide surface enables optimum force absorption. The high-quality, PAH-free rubber pads in quality are a positive development from previous models. They are dimensionally stable but still soft enough to adapt to the surface during vacuum generation. The 2-cup suction lifter with swivel heads is suited for loads of up to 35 kg (two-fold safety factor) and can be used on all materials and objects with gastight surfaces.

Specifications

Article arrangement: New

Version: suction lifter cup with swivel heads, 2x ø 120 mm

Colour: grey/blue

Weight (kg) 9

Additional specifications: suction disc ø 120 mm

Type: suction lifter

Material: plastic

Loading capacity (kg): 35

Type number: 600G

EAN Code (Gtin) 8719424147919
