

## **Product description**

Plastic drip tray suitable for one IBC container. This receptacle is made of high-quality plastic and equipped with a drain tray. The content of this drip tray is 1100 liters and has no grid. (Attention! This article is exclusive of IBC)

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series of hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid a container is collected. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

## Specifications

Article arrangement: New Version: for 1100 litres, without grid Walls: walls closed Subgroup: Plastic trays Length (mm): 2065 Height (mm): 705 Volume (ltr): 1100 EAN Code (Gtin) 8719424004656
