

Product description

Steel drip tray suitable for ten 200 liter drums or two IBC containers. The collection tray is made of painted steel and the grille of hot-dip galvanized steel. The collection volume is 1128 litres. The brackets on the underside make it easy to move the drip tray by a forklift or pallet truck.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New

Version: for 10 x 200 I drums / 2x 1000 I IBC

Walls: walls closed Top: 1000kg/m2 Colour: colorless Length (mm): 2690 Height (mm): 375

Collection volume (ltr): 1128 EAN Code (Gtin) 8719424006155 Type: receptacle for IBC and drums

Material: steel

Floor: with galvanized grid Subgroup: retention basin steel Surface treatment: galvanized

Width (mm): 1650 Weight (kg) 338

Type number: 404-1000
