Product description

Steel drip tray suitable for two IBC containers. The capacity of this container is 1186 liters. The drip tray is made of painted steel and the grille of hot-dip galvanized steel. The brackets on the underside make it easy to move the drip tray by a forklift truck or pallet truck.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety in accordance with PGS 15 (publication series of hazardous substances):

A storage facility must be such constructed so that leaked or spilled hazardous liquid is collected in a receptacle. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New
Version: for 2x 1000 l IBC
Walls: walls closed
Top: 1000kg/m²
Colour: orange
Surface treatment: painted
Width (mm): 1300
Weight (kg) 226
Type number: 404-1000

Type: receptacle for IBC
Material: steel
Floor: with galvanized grid
Subgroup: retention basin steel
Ral colour: 2000
Length (mm): 2650
Height (mm): 435
Collection volume (ltr): 1186
EAN Code (Gtin) 8719424006063
