

### Product description

Steel drip tray suitable for three IBC containers. The tray is made of painted steel, while the grille is made of hot-dip galvanized steel. The capacity of the collection tray is 1170 litres.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety in accordance with PGS 15 (publication series of hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid container is collected. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

### Specifications

Article arrangement: New  
Version: for 3x 1000 l IBC  
Walls: walls closed  
Top: 1000kg/m<sup>2</sup>  
Colour: orange  
Surface treatment: painted  
Width (mm): 1460  
Weight (kg) 362  
Type number: 404-1000

Type: receptacle for IBC  
Material: steel  
Floor: with galvanized grid  
Subgroup: retention basin steel  
Ral colour: 2000  
Length (mm): 3850  
Height (mm): 780  
Collection volume (ltr): 1170  
EAN Code (Gtin) 8719424006131
