Technical information Productnumber : 404E-A-1000-2

Product description

Steel drip tray suitable for two IBC containers. The drip tray is provided with an elevation to create a drain point. The tray is made of painted steel, while the grille is made of hot-dip galvanized steel. The capacity of the collection container is 1000 litres.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety in accordance with PGS 15 (publication series of hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid container is collected. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New Version: for 2x 1000 I IBC Walls: flat steel plate Top: 1000kg/m2 Colour: orange Surface treatment: painted Width (mm): 1460 Weight (kg) 280 Type number: 404-A-10-2 EAN Code (Gtin) 8719424006117 Type: receptacle for IBC Material: steel Floor: with galvanized grid Subgroup: retention basin steel Ral colour: 2000 Length (mm): 2650 Height (mm): 863 Collection volume (ltr): 1128 Additional specifications: raised platform with grid for filling purposes
