Product description

Galvanized steel nestable roll container with 2 swivel (braked) and 2 fixed rubber wheels. These wheels are made of elastic rubber and offer excellent driving comfort. The roll container is equipped with a door, a foldable plastic bottom and two foldable plastic levels. Thanks to the a-frame undercarriage, several roll containers can be compactly slid into each other. The floors are hinged upwards and the door is hinged against one of the side walls. These side walls are pivotally folded inwards. This saves you considerable space during storage and transport.
