## **Technical information**

## **Product description**

ADD-ON SECTION of a TÜV certified Kruizinga house brand high quality shelving unit has a load capacity of 90 kg per floor and is very suitable for store fitting, archive or office. The rack is very easy to assemble thanks to the clamp-click-ready system. Made of high-quality galvanized steel and with numerous available accessories, it can be used very flexibly. A storage rack with a TÜV certificate or TÜV quality mark is a confirmation that a storage rack meets requirements set by legislation, standards and quality marks.

See also below for combinable items. These are not available in the configurator, but can be added separately. Think for example of compartments, back and side walls or for example a clothes rail.

## NOTE: THIS IS ONLY AN ADD-ON SECTION:

A minimum of one basic section (55-SET-1M400) is required to fit this add-on section, after that infinite expansion is possible.
