### Product description

A used demountable META shelf rack (3970x340x2000 mm) made of galvanized steel is a durable and versatile storage system in various environments, such as warehouses, garages or industrial areas. Galvanized steel offers excellent corrosion resistance, making the storage rack durable and suitable for various environments, including humid conditions. The demountable feature makes it easy to set up, adjust or move the storage rack as needed. This is convenient for flexible storage solutions and any future changes to the setup. The height adjustability of the shelves makes it possible to adapt the storage space to different types of products. The closed side walls provide additional protection to stored goods and prevent items from falling to the sides. The open front and back facilitate easy access to stored items, making loading and unloading more efficient. This design is useful in situations where speed and convenience are important. With an overall width of 3970 mm and a depth of 340 mm, the storage rack provides ample space without taking up much floor space. This makes it suitable for both large storage areas and smaller workspaces.

This demountable shelving unit consists of:

- 4 uprights of 200x34 cm
- 33 shelves of 130x30 cm
- 132 clips
- 2 struts
- 2 tensioners

### Specifications

Article arrangement: Used

Version: complete with accessories

Subgroup: Shelving used

Colour: colorless

Width (mm): 3970

Height (mm): 2000

Internal depth (mm): 300

Type number: 7279GB

Type: Meta static shelving rack

Material: steel

Shelves: adjustable in height

Surface treatment: galvanised with signs of use

Internal width (mm): 1250

Depth (mm): 340

Options: shelves adjustable and removable
