Product description

Used plastic stacking bins with Euronorm dimensions of 600x400 mm is a widely used type of transport and storage container in logistics and industrial applications. The storage bin has a capacity of 53 liters, which means that you can store considerable amounts of goods in it, such as parts, products or materials. The smooth inner walls ensure that the stored goods do not get stuck in any grooves or rough surfaces. This facilitates loading and unloading and prevents damage to the stored items. In addition, the inner walls are easy to clean. The two open handles make it easy to lift and move the bin, even when full. Features a reinforced bottom that provides extra stability and durability. This is especially important if the bin has to carry heavy loads, to prevent sagging or damage to the bottom. The robust stacking edges allow you to safely stack multiple bins on top of each other. This maximizes storage space and makes efficient use of the available space in a warehouse or storage area. In short, these plastic stacking bins are ideal for varied applications in the logistics and industrial sector because they are durable, stackable and easy to handle.

Specifications

Article arrangement: Used

Version: all walls closed + open handles

Walls: open handles

Food-safe: no

Colour: grey

Length (mm): 600

Width (mm): 400

Height (mm): 280

Volume (ltr): 53

Type number: 6808GB

Type: stackable

Material: plastic

Floor: reinforced

Euronorm (mm): 600 x 400

Surface treatment: signs of use

Internal length (mm): 550

Internal width (mm): 350

Internal height (mm): 275

Weight (kg) 2.5

EAN Code (Gtin) 8719424225112
