Product description

A 50-liter plastic outdoor trash can is a convenient and durable solution for managing waste in outdoor environments. Made of high-quality plastic, this outdoor trash can is resistant to weather, UV rays and corrosion. This extends its lifespan and ensures that the trash can perform its function for a long time. The bin is equipped with a throw-in opening, allowing users to easily deposit their waste. The roof over the insertion opening protects against rainwater and prevents waste from blowing out easily. With a capacity of 50 liters, the bin provides ample space for collecting waste in public areas, parks, parking lots or other outdoor locations where waste management is needed. This outdoor trash can be placed in a variety of ways. It can be placed on the ground or attached to a wall or pole. This provides flexibility in choosing the optimal location for waste management. The bin is emptied by means of a triangle key. This key is used to remove the bin from the stand or attachment point. This provides a secure and controlled method of emptying and prevents unauthorized access to the bin.

Specifications

Article arrangement: Used

Version: with throw-in opening incl. roof

Subgroup: Outdoor waste bins

Length (mm): 350

Height (mm): 830

Type number: 8699

Type: plastic waste bin

Material: plastic

Colour: black

Width (mm): 350

Volume (ltr): 50

EAN Code (Gtin) 8719424046274
