Product description

The Matador Toro wheelbarrow offers an innovative alternative to the conventional wheelbarrow. An ergonomic replacement for the traditional wheelbarrow. Traditionally, moving loads requires lifting them, but according to ARBO standards, as of September 1 it is more strictly regulated by the labor inspection, with a maximum lifting limit of 25 kg. With the Toro, this is practically a thing of the past, as the load is pushed with the Toro.

The Toro is designed with special handles for every movement and maneuver required when moving the load, such as turning, reversing and emptying. In addition, the improved weight distribution and handle height ensures that back strain is significantly lower than with a traditional wheelbarrow, even when maneuvering over a scaffold board, for example. The Toro also features a specially designed brake, which can be easily and safely engaged by stepping on it, bringing the Toro to a safe stop.

Specifications

Article arrangement: New

Version: with puncture-proof PU tyres

Wheels front: puncture-proof PU tyre Ø 400 mm

Colour: green

Internal length (mm): 970

Internal width (mm): 920

Internal height (mm): 380

Volume (ltr): 90

Type number: 6316986

Type: Matador ergonomic wheelbarrow

Material: HDPE

Wheels back: puncture-proof PU tyres Ø 260 mm

Length (mm): 1650

Width (mm): 620

Height (mm): 1150

Loading capacity (kg): 250

Weight (kg) 26.4
